Chaco etc:  $\delta$   
Against Absam. 3

- Jeters - all new ltrs from crossroads. Carry - clearly shows height was increased.
- appearance of rays not appreciably cut off + in contrast the finished appearance. However, range low for front not appreciably (a/c).
- Scurrell - is in Lib + proump? against + heart to vscs. We publish courtesies when appears pre-  
applied. This goes right home. No vscs put for  
L spot increase ~~at~~ after off etc.
- Jyc - When this app? came last have vscs against  
and otherwise extract L B'gnt 2 miter  
from heaving of beam - on SL became aware  
of bulk on Rth side which increases with  
L spot increase. 150 measurements, 150 big.  
net in hour space. After search was complete  
a review begun but is big. The app? shift  
applied to R. L spot off etc.  
When vscs control source of question? Ya.  
How much this sit case? The case?

- Lewis
- Lewis
- Scurrell - Cost compensate for loss of two c/s.

The decision get to how stage?

Can we compensate?

Cost compensate for loss of two c/s.

DH - cost

but remaining idly but being compens.

interpret as heavy of net focusing app?
