We are writing to object to the proposed street trading at A38 layby, Buntsford Hill for following reasons:

Increased noise near our property generated by the unit itself and increased footfall in the area. This will be particularly noticeable in spring and summer months when long periods are spent outside.

Additionally, if the unit is trading from seven in the morning, it will presumably be setting up well before this time meaning the noise generated will be at an unsociable hour.

Increased pollution to the atmosphere caused by the operation of the unit. Vehicles/lorries stopping at the unit are also likely to leave engines running in winter months further increasing pollution near our property.

Cooking odours which is not something you wish to experience in the area immediately surrounding your home.

There are already numerous food outlets in the immediate vicinity to sufficiently accommodate passing trade e.g. Subway, Greggs, Morrisons and KFC.

I trust you will note the above points and at a time when we are all looking to reduce the carbon footprint, reject this application accordingly.
