Good Morning Tarek,

Hope you are well.

I am writing you today to discuss about the TPO that has been put on a large Oak tree overlapping my back garden. I received the letter about this in the week commencing 10<sup>th</sup> August. Below are the reasons I would like the TPO to be revoked:

- I have young children that play in the garden and have had acorns and branches drop on them or near them.
- I have a small shitzu dog who has been eating the acorns- This is poisonous to dogs! So I have to go out daily to clear up the acorns.
- My Son and daughter both have asthma and during the tree pollen season they get really affected by it and have to have their inhalers more often. Ambulances have also been called due to this.
- I am a single parent and find it hard work to keep cleaning up the leaves from fall.
- There is also limited sun light. We are pushed to sit and play on my drive if we want to enjoy the sunshine. This shouldn't be right when we have our own back garden

Is there any way we could set up a day that we are all able join to meet and discuss about the tree being cut to boundary?

Kind Regards,  
Amy (Number 7 beehive close)
